

## **INTERNATIONAL ENVIRONMENTAL LAW Fall 2005**

For our first class, please read pages v-xii, 1-42, 1517-1521 in the required course text International Environmental Law and Policy (Foundation 2d ed 2002).

Please NOTE that your purchase of the Guruswamy "Basic Doc. Supp." definitely is optional, not required, given the alternative sources of treaty texts readily available to you.

A free course syllabus packet is available from the 3rd floor course handout table. Course coverage, organization, and grading options also will be discussed at that first class. Please note that your papers or exam answers submitted for your course grade must be word processed or typed, not handwritten.

For our 2nd class, please read pages 166-216. For our 3rd class, please read pages 272-335, 369-370.
